LIQUOR EMBASSY

Platform: React, Spring Boot, Hibernate, mysgl, HTML5, CSS3.

The project aims to develop an online platform for a liquor delivery shop, enabling customers to conveniently browse, order, and receive alcoholic beverages of their choice. The platform will provide a user-friendly interface accessible through web, allowing customers to explore a wide range of liquor products, place orders, make payments, and track the delivery status. The system will integrate various features to ensure legal compliance, age verification, and a secure payment gateway.

Design And Fabrication Of Gas Trolley With Weight Measurement System

This project involved the development of a trolley that measures and displays cylinder weight accurately. It throws warning when

the weight reaches to the minimum level indicating it's time to refill. It required expertise in Mechanical design, Sensor Integration, and Data Visualization.
